

TAMAS Z-BLOCK

Expandable Zoning Block

The Tamas Zone Block is an all-inclusive, plug-and-play zoning device, capable of pumping to a variety of different applications. The Z-Block is expandable to suit a range of zoning requirements, and can also be used as an injection pump or boiler pump.

FEATURES

- Save time and money on quick installation
- Expandable and can meet various application requirements
- Great for mechanical room retrofits
- Very little soldering required
- Full list of available accessories to suit all needs
